DETAILED ACTION

Allowable Subject Matter

Claims 1-3, 6-15, 17-25 are allowed.

The following is an examiner's statement of reasons for allowance:

Applicant has presented additional prior art, however, the closest prior art has already been considered and applied by the examiner. Most of the prior art cited therein by applicant was listed in the corresponding EP equivalent search report, which has been considered by the examiner. Applicant's WO 2004/050069 A1 application is cited herein to complete the record. The search report of applicant's '069 application recited WO 00/51574 as being of interest to applicant's claims 5 and 16. (Applicant cited US 6,258,380 in the recent PTO-1449, the US equivalent of the WO-'574.) However, the WO-'574 application, while disclosing the bloom values and plasticizer percentage, states nothing about the capsule diameter, thickness or ratio. Applicant's specification, published paragraph [0032], makes it clear that these are important features in combination with the bloom value. The additional references cited by applicant are farther away from those already considered. The only reference discussing bloom value that had not been previously considered is applicant's cited patent to Borkan '243, however, the composition is not as claimed by applicant, and the Bloom values differ. Accordingly, the claims are allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should

preferably accompany the issue fee. Such submissions should be clearly labeled

“Comments on Statement of Reasons for Allowance.”
